ASTORIA, OREGON, TUESDAY, MARCH 17, 1903.

NUMBER 65.

"Tailored-by-Hand"

Isn't commonly thought of in ready-to-wear clothes; you expect to pay extra for it. You needn't; Hart, Schaffner & Marx clothes are "tailored-by-hand" as much as the custom tailor's product; and better done than the most of 'em. It's one thing that makes these clothes "ready-to-wear" instead of just "ready-made."

With other first-class goods for gentlemen and boys they are sold by

Itinerary of Tour

Western Legislators Confer With President, but Few Changes Are Made.

Roosevelt Will Make Thorough Tour of Northwest and Will Deliver Many Speeches of an Important Na- ture While Enroute.

Washington, March 16.—Several senators and members of the house of representatives from the western states had a conference with President Roosevelt concerning his proposed tour of the west and northwest. Dates for the president's visits to the cities of the several states to be included in his journey were discussed and a few changes were made, but the itinerary of the trip has practically been completed with the exception of the time of the arrival and departure of the president from a few places. The itinerary is now in the hands of the railroads for an exact determination of running time.

The party will leave Washington on the morning of April 1 and will proceed directly via the Pennsylvania railroad to Chicago, arriving there the next morning. April 2 will be spent in Chicago. From Chicago the president will go to Madison, Wis., where he will address the legislature. Thence he will go to Milwaukee. The next morning the president will go to St. Paul and Minneapolis, leaving the latter city late that night and arriving in Sioux Falls, S. D., the next morning.

He will spend from the 5th to the 8th in the Dakotas, and will visit Livingston, Mont., at noon that day. The president's train will be sidetracked there until Friday, April 24. President Roosevelt, accompanied by Secretary Root and John Burroughs, poet and naturalist, of New York, will make an extended tour of Yellowstone National park, under the guidance of Major Pitcher, the park superintendent. Communication will be maintained with the president daily during his absence.

On April 24 the president will leave Cinnabara and will arrive at Alliance, Neb., April 25. He will visit Kansas and Iowa and will arrive in St. Louis on the afternoon of the 29th. That night and April 30 the president will remain in St. Louis, participating in

the ceremonies incident to the dedication of the Louisiana Purchase exposition grounds.

He will be in Colorado May 15th and in New Mexico on the 5th. The greater part of May 6th will be spent at Grand Canyon, Ariz. From the 7th to the 19th of May the president will be in California, four days of which will be spent in Yosemite valley and the big tree region. On May 19th the president will enter Nevada, returning to Sacramento the same evening.

On May 26th he will be at Ashland, Ore. Thursday morning, May 21, will be spent at Salem, reaching Portland early that afternoon, where he will remain until the next morning.

From Portland the president will go to Washington, stopping at Chehalis, Centralia, Olympia and Tacoma. At Tacoma the president and his entire party will take a boat trip Saturday, May 3, on Puget sound, touching at Bremerton and Everett, ending the trip at Seattle late that afternoon. Sunday, May 24, will be passed in Seattle.

The other Washington cities to be visited on May 25th are Ellensburg, North Yakima, Pasco, Wallula and Walla Walla.

On the morning of May 26th the president will arrive at Spokane, remaining there several hours. During that day he will stop at Tekoa, Wash. and Harrison and Wallace, Idaho. In the morning he will reach Helena, Mont., and during the day will visit Butte. He will go into Idaho on Thursday, May 28, stopping at Pocatello, Boise, Nampa, Mountain Home and Shoshone. Early Friday, May 29th, he will reach Salt Lake City, Utah. At Laramie, Wyo., May 30th, the president will leave his train and spend May 30th in a manner suitable to Memorial day.

During the trip the president will make many speeches and many of them will be sustained efforts of notable importance.

Mississippi Overflows

Memphis, March 16.—Tonight the waters of the Mississippi river are rushing through three-quarters of a mile of crevices in the embankment with a roar that can be heard for miles. This is the first break that has been made in the vicinity of Memphis, but water is still rising at a rapid rate and other points are threatened.

VERY ANNOYING.

This Hardly Expresses What Astoria People Say of It.

Any itchingness of the skin is annoying. Little danger in itching skin diseases, but they make you miserable. Doan's Ointment is a never failing cure.

For piles, eczema, and all itching troubles.

Astoria citizens endorse it.

Mrs. Helen Lewis, who lives at No. 52 Astor street, says: "I consider Doan's Ointment the best remedy of the kind I ever used. Every winter for the past 10 or 12 years I was troubled with a breaking out around my mouth and lips. Sometimes the cracks at either corner of my lips were so sore that I could hardly speak. I could look for this annoyance as soon as cold weather commenced, and it annoyed me until warm weather set in. Nothing I could do had any effect on it. I finally read about Doan's Ointment and got a box at Charles Rogers' drug store on Commercial street. A few applications of this wonderful remedy cured it up completely and I have not had any trouble since. It is now over three months since I used it."

For sale by all dealers. Price 50 cents per box. Foster-Milburn company, Buffalo, N. Y., sole agents for the United States. Remember the name—DOAN'S—and take no substitute.

Better Pay Up, There

South American States Offended in Their Dignity.

New York, March 16.—The Herald, according to a Valparaiso, Chile, dispatch to the Herald, publishes a remarkable article about the Monroe doctrine, in which it says "South America ought to quietly notify the United States that she does not seek the Monroe doctrine's protection, but her own. She ought also to notify Europe thus: 'We cannot decorously continue to be regarded as Turks. That is to say, we are not outside the international law practiced by the greater powers among themselves.'"

The writer concludes by saying:

"Paramount above everything is our duty to place ourselves in a worthy position before the world. South America ought to renounce the inevitable benefits of the so-called doctrine." The correspondent adds that since the Baltimore affair, many Chileans distrust the United States more than Europe.

ANOTHER LORENZ OPERATION.

Successful Trial of New Machine for "Mending" Children.

New York, March 16.—For the first time in this country the Lorenz machine has been used in operation for

hip disease. The operation was performed by Dr. Frederick Mueller, a pupil of Dr. Lorenz.

A girl, almost 12 years old, who had suffered from a disease of the hip which drew her right foot up to and touching her left calf, was made normal and in form in 40 minutes. Her leg four inches shorter than the other, was drawn into proper position and of equal length with its mate, and the girl, after coming out of the ether, lay still and white, but without pain and completely "mended." Dr. Mueller said that the operation was long and painful to all except the patient, but the shining crib of silver did the work for which Dr. Lorenz had built it and the girl will walk.

Send Deadly Champagne

Theatrical Manager Receives Bottle of Quick Poison.

New York, March 16.—Detectives in New York and several members of a Chicago detective agency have been at work attempting to discover a mysterious person who sent John C. Fisher, a well known theatrical manager of this city, a quart bottle of champagne charged with enough hydrocyanic acid and strychnine to kill instantly 100 men. It was only by the merest chance that Mr. Fisher and three friends escaped death.

The bottle was opened and the contents poured into glasses, before it was noticed that it had a peculiar look and smell. Mr. Fisher had the contents of the bottle analyzed and it was found that the wine contained 2,016 grains of hydrocyanic acid to the fluid ounce, and 22,464 grains of strychnine, or enough of the two poisons to have produced sudden death, had any of the champagne even been touched by the tongue.

A young and handsome woman figures conspicuously in the case. According to credited information this young woman took the poison package to the Chicago express office and forwarded it in person.

A motive has been established and it implicates a woman and possibly a man. Whom Mr. Fisher suspects he will not say at this time, but he intimates that developments may be expected any day in Chicago.

Plan to Re- form China

New York, March 16.—Secret agents of Chinese progress in this city have received information from San Francisco that the crusade for the liberation of China is to begin at once. America is to be the headquarters of Kung Yu Wei, the young reformer and ex-member of the Tung Hsi yamen, who seek through his society, the Bow Wong Wul (society for the protection of the emperor) for the purpose of making Kwang Hui emperor in fact as well as in name. Kung Yu Wei, it is rumored, is now on the Pacific, bound for this country, and after establishing the main office of his propaganda here will tour the world, organizing branches in the various capitals of Europe, made up of educated and influential Chinamen.

Approves the Czar's Plans

Giving of Religious Freedom in Russia a Great Event.

Baltimore, March 16.—Cardinal Gibbons, commenting on the czar's manifesto, is quoted as saying:

"In my judgment it may be considered the most unexpected as well as the most important and beneficent movement that has occurred in the Twentieth century."

"I have some misapprehensions, however—I trust that they are groundless—that the ecclesiastical authorities, who are very powerful in Russia, may in some respects modify the beneficent features of the decree. I hope that the Jews will have a share in the proposed radical change."

More Success Than Sense.

Jumps From Third Story With Clothes Line Tied to His Neck.

Chicago, March 16.—With a clothes line about his neck, the end of which was made fast to a window ledge, Henry Pike leaped from a window on the third floor of a boarding house last night. The rope with which Pike thought to hang himself broke, but he fell to the stone sidewalk in front of the building and was killed.

Pike was an Englishman, 57 years old. He had been out of employment and had become despondent.

Typhoon Flood

Steamer Reaches Frisco With Fresh News of Terrible Death in South Seas.

Terrorized Natives Fled to the Heights and Were Found Tied to Trees and Rocks, Where Waters Had Washed Over Them.

San Francisco, May 16.—The steamer Mariposa arrived today from Australia bringing additional news of the typhoon and tidal wave at Pearl Island grounds in the middle of January. The French government has investigated the disaster and found that about 600 islanders perished during the storm. The property loss is half a million dollars. After the wind had subsided and the waters had receded hundreds of the drowned natives were found tied to trees about the place.

Hiquera, one of the islands visited by the deluge was best able to withstand its force, as its highest place is 12 feet above the ocean. Residents flocked to the heights and sought safety by binding themselves to rocks and trees. There they remained for three or four days in which the storm swept over the dreadful scene.

The islands of Hao, Morakau, and Hiquera are practically washed away. They are at present a little above sea level, and are destitute of vegetation. On them a man cannot subsist as the soil is vanished, and coconut trees are dried up dead.

On the awful night of January 15th

during the darkness and a driving downpour of rain, parents tied their little children to their backs and sought safety. Over their heads rolled a mighty wave, and when the surges retreated and the infants and half-grown boys and girls succumbed, the fathers and mothers would vainly endeavor to retain the corpses of their dead but usually at length had to abandon them.

Several missionaries passed a terrible night in the trees, and narrowly escaped death. Out on the surface of the deep sharks were seen to devour many bodies, while in the lagoon beds were floating upon debris.

The story of fatality in Moraku, where 35 out of 100 perished, is extremely sad. It is likely that one-fifth of the entire population of the Tuamotu group succumbed. About 1000 survivors were in danger of perishing from thirst or disease.

It was to the credit of Americans that relief from thirst came in the form of condensed water. With primitive machinery 3000 gallons of fresh water were distilled daily for several days. Food has been sent from other islands.
